DIAGNOSTIC TYPE

Board Review

EVIDENCE BASE

8 indexed sources · 20 facts

CONFIDENTIALITY

Confidential · Internal leadership and approved advisers only

Decision-support diagnostic based on indexed evidence. Readiness indicators require human validation and do not constitute certification, audit, statutory, regulatory, or customer approval.

Executive Decision Summary

PulseIQ powers the RightSense 48-Hour Enterprise Intelligence, Compliance & Standards Diagnostic.

OVERALL READINESS POSTURE

34%

Foundational evidence and ownership gaps require action

This indicates the evidence base is not yet sufficient for customer qualification, audit readiness, or board-level performance decisions without internal validation.

CRITICAL READINESS GAPS

9

Leadership closure required

REVENUE BLOCKED BY EVIDENCE GAPS

₹10.4Cr

Illustrative exposure, not a forecast

⚠️ Top 3 risks

✓ Win rate gap of 7pp: Current 24% vs required 31% — largest single driver of the revenue gap.

✓ Supplier cost escalations: 2 suppliers with >8% QoQ cost increase — could compress margin another 1.5pp.

✓ Working capital tied up: ₹40 Cr in receivables and inventory; promoter ₹4 Cr support bridge is short-term.

💡 Top 3 opportunities

✓ Exit low-margin SKUs (3 lines): ₹1.5Cr potential impact over 90 days.

✓ Procurement cost reset on top 2 escalated suppliers: ₹80L potential impact over 120 days.

✓ AR collection drive (₹18 Cr → ₹12 Cr): ₹6Cr potential impact over 60 days.

🎯 Immediate 14-day actions

✓ Confirm the executive sponsor and accountable evidence owners.

✓ Validate revenue, margin, working-capital, and productivity baselines.

✓ Open the controlled proposal register and approval checkpoint.

📄 Internal data required

✓ [Official Financial Truth] Unit economics per SKU not available in ERP export.

✓ [Official Financial Truth] Customer-level profitability not available in source set.

✓ [Strategic Management Intent] Mid-quarter management review not included in the source set.

🛡️ Board decision required

Approve a 90-day evidence-readiness program with named owners and monthly Board review.

🛡️ Executive sponsor required

Nominate a CFO/COO sponsor across Commercial, Quality, Compliance, Procurement, IT, and Operations.

Board Scorecard

Decision signals derived from the existing cockpit and structured evidence-readiness register.

Area	Value	Status	Confidence	Management action
Revenue signal	₹120Cr	Off track	High	Validate the monthly revenue bridge and product-family pipeline.
Margin signal	21%	At risk	High	Approve product-family margin ownership and leakage reviews.
Productivity visibility	₹28.6L/emp	Off track	High	Confirm headcount and capacity data before setting productivity actions.
Standards readiness	24%	Off track	Medium	Index applicable standards evidence and assign closure owners. Owner: Quality / Engineering.
Customer qualification readiness	40%	Off track	Medium	Build the controlled customer prequalification evidence pack. Owner: Commercial Operations.
Statutory readiness	30%	Off track	Medium	Index current statutory documents, expiries, and review evidence. Owner: Compliance / CFO.
Supplier readiness	37%	Off track	Medium	Establish critical-supplier qualification and dependency tracking. Owner: Procurement.
AI governance readiness	38%	Off track	Medium	Implement traceable human output review and approval history. Owner: AI Governance Owner.
Revenue blocked by evidence gaps	₹10.4Cr	At risk	Low	Validate opportunity-level exposure before Board forecasting.

Board interpretation

The current public-domain evidence base is useful for opportunity identification, but not yet sufficient for management decisioning. The first 30 days should focus on internal baseline validation, evidence ownership, customer qualification readiness, and operating cadence.

Priority Findings and Evidence Requests

The main report shows only the highest-priority decision signals. Full truth-layer detail is retained in the appendix.

Priority	Decision signal	Evidence gap	Why it matters	Required validation
P1	FY25 actual revenue ₹120 Cr vs FY26 strategy target ₹150 Cr — 20% growth gap.	Unit economics per SKU not available in ERP export.	Material Board, revenue, margin, delivery, or assurance decision risk.	[Official Financial Truth] Unit economics per SKU not available in ERP export.
P2	FY26 run-rate forecast ₹134 Cr is 11% below the ₹150 Cr strategy target.	Customer-level profitability not available in source set.	Material Board, revenue, margin, delivery, or assurance decision risk.	[Official Financial Truth] Customer-level profitability not available in source set.
P3	FY25 gross margin 21% is 5pp below the FY26 target of 26%.	Mid-quarter management review not included in the source set.	Material Board, revenue, margin, delivery, or assurance decision risk.	[Strategic Management Intent] Mid-quarter management review not included in the source set.
P4	Strategy plan commits to ₹150 Cr revenue and 26% gross margin in FY26.	OEE and downtime data not in current source set — would need MES export.	Material Board, revenue, margin, delivery, or assurance decision risk.	[Operational Reality] OEE and downtime data not in current source set — would need MES export.
P5	Required proposal win rate of 31% is 7pp above the current 24% — explicit board action item.	End-to-end process map for proposal → production → delivery not in source set.	Material Board, revenue, margin, delivery, or assurance decision risk.	[Process and SOP Truth] End-to-end process map for proposal → production → delivery not in source set.

Readiness action table

Five accountable 30-day actions across standards, customer qualification, statutory evidence, suppliers, and AI governance.

Area	Status	Business impact	Owner	30-day action
Standards	24% readiness	May affect bid, vendor registration, audit, or delivery evidence readiness	Quality / Engineering	Confirm applicability and index approved evidence.
Customer qualification	40% readiness	₹1.2Cr illustrative exposure	Company Secretary	Build a controlled prequalification evidence pack.
Statutory evidence	30% health	May affect audit, license, tax, or customer assurance readiness	Compliance Lead	Index documents, expiries, review dates, and source links.
Supplier ecosystem	37% health	Could delay two priority customer orders	Procurement Head	Launch critical-supplier qualification and dependency tracker.
AI governance	38% readiness	Weak traceability may limit trusted use of generated outputs	AI Governance Owner	Implement source, prompt, output, and human-approval records.

30 / 60 / 90-Day Leadership Roadmap

A management-owned closure sequence, replacing raw generated action text with a consistent operating plan.

30 days Establish trusted baseline	→ Validate internal financial baseline → Create proposal register	→ Build product-family revenue/margin view → Index critical statutory and standards documents
Outcome: CFO/COO-approved evidence baseline		
60 days Build qualification and control systems	→ Build customer qualification pack → Create working-capital visibility cockpit	→ Establish supplier qualification tracker → Implement AI output review workflow
Outcome: Customer-ready qualification and governance pack		
90 days Institutionalize operating intelligence cadence	→ Board operating cadence → Standards evidence governance	→ Customer audit readiness pack → Scalable PulseIQ operating intelligence rhythm
Outcome: Monthly board operating-intelligence rhythm		

Evidence Boundary Summary

Compact supporting context for management validation. Full source-level detail remains in the Detailed Workbench Report.

Truth area	Confidence	Findings indexed	Priority validation gap
Official Financial Truth	High	4	Unit economics per SKU not available in ERP export.
Strategic Management Intent	High	3	Mid-quarter management review not included in the source set.
Operational Reality	Medium	3	OEE and downtime data not in current source set — would need MES export.
Process and SOP Truth	Medium	2	End-to-end process map for proposal → production → delivery not in source set.
Collaboration Truth	Low	0	No email or meeting sources registered for this assessment.

Source coverage: Available in Detailed Workbench Report

Detailed findings, contradictions, source excerpts, scenarios, and recommendations remain available in the Detailed Workbench Report for internal review.

Method, Evidence Boundary, and Disclaimer

The Board should read all conclusions within the evidence and human-review boundaries below.

PulseIQ and RightSense identify readiness gaps, workflow risks, documentation gaps, and improvement opportunities. They do not provide ISO certification, legal certification, statutory audit, regulatory approval, or formal customer approval.

Scores and revenue exposure are diagnostic prioritization aids, not forecasts, audit opinions, legal advice, certification decisions, or representations of customer acceptance. Human review and approved source evidence are required before management action.
